

1. Record Nr.	UNINA9910782145103321
Titolo	Anesthesia and Analgesia in Dermatologic Surgery : Anesthesia and Analgesia in Dermatologic Surgery
Pubbl/distr/stampa	New York : , : CRC Press, , 2008 ©2008
ISBN	0-429-52476-5 0-429-18597-9 1-281-72439-4 9786611724399 1-4200-1923-6
Descrizione fisica	1 online resource (230 p.)
Collana	Basic and clinical dermatology ; ; 42
Altri autori (Persone)	HarahapMarwali AbadirAdel R
Disciplina	617.96 617.967477
Soggetti	Anesthesia Analgesia Skin - Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Local anesthetics and anesthetic solutions: classification, mode of action and dosages / Eckart Haneke -- Vasoconstrictors: chemistry, mode of action, and dosage / Paul O. Larson -- Topical anesthetics / S. 't. Kint and D. Roseeuw -- Local infiltration anesthesia / Christie T. Ammirati and George J. Hruza -- Regional anesthesia / Conway C. Huang -- Tumescant anesthesia / William B. Henghold and Brent R. Moody -- Local anesthesia for children / Thierry Pirotte and Francis Veyckemans -- Iontophoresis for local anesthesia / W. T. Zempsky -- Use of nitrous oxide in hair transplantation surgery / Neil S. Sadick -- Moderate sedation in dermatologic surgery / Omar Torres, Dwight Scarborough, and Emil Bisaccia.
Sommario/riassunto	With malpractice insurance premiums on the rise, and insurance rates for the practicing anesthesiologist at an all time high, it is important,

now more than ever, to have a single source reference related to both anesthesia and analgesia and how they both relate to dermatologic surgery. This book provides comprehensive coverage on the therapeutic usage of anesthesia and analgesia during dermatologic surgical procedures, providing basic concepts, as well as step-by-step descriptions of the various techniques involved. Written by an international group of contributors, *Anesthesia and Analgesia in Dermatologic Surgery* is the first book of its kind to: present both anesthesia and analgesia techniques in a single source volume.; covers the basic principles of regional and local anesthesia with respect to anatomy, local anesthetic agents, and techniques.; examines new eutectic mixtures that penetrate through the skin's membrane, enabling doctors to use analgesia over anesthesia for a wide range of superficial surgical procedures, including the harvesting of split skin grafts, laser surgery, electrosurgery, epilation, and skin biopsy.; discusses the use of nerve blocks as safer alternatives to local anesthesia.; contains a full chapter dedicated to the pediatric patient, and the specific concerns when relating anesthesia to the pediatric patient.
