Fire in the Well -- 3. The Reformation -- 4. The Wrong Side of the River -- 5. Daw and Duw --6. Death and Nondiscrimination -- Conclusion -- Notes -- Glossary --References -- Index Sommario/riassunto For centuries, the Aghori have been known as the most radical ascetics in India: living naked on the cremation grounds, meditating on corpses, engaging in cannibalism and coprophagy, and consuming intoxicants out of human skulls. In recent years, however, they have shifted their practices from the embrace of ritually polluted substances to the healing of stigmatized diseases. In the process, they have become a large, socially mainstream, and politically powerful organization. Based

on extensive fieldwork, this lucidly written book explores the dynamics

of pollution, death, and healing in Aghor medicine. Ron Barrett examines a range of Aghor therapies from ritual bathing to modified Ayurveda and biomedicines and clarifies many misconceptions about

this little-studied group and its highly unorthodox, powerful ideas about illness and healing.
