| Sommario/riassunto | Volume 1 of A Grammar and Dictionary of Indus Kohistani contains around 8.000 lemmata, many of which are supplemented with parallels from adjacent dialects, from other Dardic, from Nuristani, Indo-Aryan, Iranian, Dravidian and Munda languages, and from Burushaski. The lemmata have been, wherever possible, provided with information about their origin, and they are connected by numerous cross-references. Since Indus Kohistani is a pitch accent language with complicated rules governing the behaviour of the two pitch accents in compounding, derivation, and inflexion, the lemmata are not only marked with their appropriate pitch accents, but the behaviour of the accents (change of value, shift) is illustrated with a large number of inflected forms and cross-references. And since Indus Kohistani has a rich (and frequently irregular) inner and outer conjugation, most verbs are provided with many finite and participle forms. In addition, the dictionary contains two indexes (English - Indus Kohistani and Old Indo-Aryan - Indus Kohistani), and lists with place and clan names, names of the months, etc. |
