Sommario/riassunto

After surgery for localized prostate cancer, you may find that treatment related side effects may lead to some difficulty readjusting to everyday life. You may notice an increase in your stress levels or experience problems in your relationships. Even though you may be physically healthy, you may need to work on improving your quality of life. Effective stress management may also help maintain your overall health. In this group program, you will learn skills to effectively manage your stress. These skills can be used to cope with stressful situations related to having had prostate cancer or wi
