Sommario/riassunto	Before, during and after the preparation of Classical Hebrew Poetry: A Guide to its Techniques, Wilfred Watson published several articles on Hebrew poetry in a wide range of periodicals. The present volume collects together the most significant of these writings, including a chapter from a book on chiasmus, as well as a few unpublished items. After an opening survey of current work on Hebrew verse the articles cover the following topics: parallelism (including half-line parallelism, previously almost unnoticed), antithesis, word pairs, chiasmus, figurative language and introductions to speech
