Sommario/riassunto	How is it that some conservative groups are viscerally antigovernment even while enjoying the benefits of government funding? In <i>Piety and Public Funding</i> historian Axel R. Schäfer offers a compelling answer to this question by chronicling how, in the first half century since World War II, conservative evangelical groups became increasingly adept at accommodating their hostility to the state with federal support. Though

holding to the ideals of church-state separation, evangelicals gradually took advantage of expanded public funding opportunities for religious foreign aid, health care, education, and social welfare. This was especially the case during the Cold War, when groups such as the National Association of Evangelicals were at the forefront of battling communism at home and abroad. It was evident, too, in the Sunbelt, where the military-industrial complex grew exponentially after World War II and where the postwar right would achieve its earliest success. Contrary to evangelicals' own claims, liberal public policies were a boon for, not a threat to, their own institutions and values. The welfare state, forged during the New Deal and renewed by the Great Society, hastened-not hindered-the ascendancy of a conservative political movement that would, in turn, use its resurgence as leverage against the very system that helped create it. By showing that the liberal state's dependence on private and nonprofit social services made it vulnerable to assaults from the right, *Piety and Public Funding* brings a much needed historical perspective to a hotly debated contemporary issue: the efforts of both Republican and Democratic administrations to channel federal money to "faith-based" organizations. It suggests a major reevaluation of the religious right, which grew to dominate evangelicalism by exploiting institutional ties to the state while simultaneously brandishing a message of free enterprise and moral awakening.

Sommario/riassunto	The OT semantic field of 'colour' is presented as a coherent, interdependent, and graded linguistic structure. The relevant lexical items are organized under the following categories: primary (basic) terms; secondary and tertiary terms; terms for pigments, dyes, painting and paints; and terms for stains, speckles, and other phenomena related to colour. Proper names, and names of objects which carry 'colour' associations are discussed as well. Many OT texts are discussed in detail. Finally, the OT colour field is compared to its Mishnaic Hebrew counterpart, and an Appendix dealing with the rene
