Sommario/riassunto	<p>This standard supersedes ANSI C92.2-1981, Preferred Voltage Ratings for Alternating-Current Electrical Systems and Equipment Operating at Voltages Above 230 kV Nominal. Preferred maximum voltage ratings provide guidance in the development and design of these systems and equipment. Preferred nominal voltage ratings are included to provide consistent standard designations for electrical systems in the extra-high and ultra-high voltage classes. This standard includes preferred voltage ratings up to and including 1200 kV maximum system voltage, as defined in the standard. Above this value, additional research and development work is needed before standard voltage levels can be specified. It is expected that the next voltage level to be established will be as high as is technically and economically feasible at the time that it is introduced.</p>

Sommario/riassunto	In 1959, at the age of 22, Joanna Russ published her first science fiction story, "Nor Custom Stale," in <i>The Magazine of Science Fiction and Fantasy</i> . In the forty-five years since, Russ has continued to write some of the most popular, creative, and important novels and stories in science fiction. She was a central figure, along with contemporaries Ursula K. Le Guin and James Tiptree, in revolutionizing science fiction in the 1960s and 1970s, and her 1970 novel <i>The Female Man</i> is widely regarded as one of the most successful and influential depictions of a feminist utopia in the entire genre. <i>The Country You Have Never Seen</i> gathers Joanna Russ's most important essays and reviews, revealing the vital part she played over the years in the never-ending conversation among writers and fans about the roles, boundaries, and potential of science fiction. Spanning her entire career, the collection shines a light on Russ's role in the development of new wave science fiction and feminist science fiction, while at the same time providing fascinating insight into her own development as a writer.
