Sommario/riassunto	This is a study of the domestic application of armed coercion during the reign of Louis XIV. It examines the coercive aspects of tax collection, the royal response to tax revolts, and the use of force to convert the king's Protestant subjects and to wage a devastating counterinsurgency campaign against Protestant rebels in the mountains and plains of Languedoc. Relying heavily on archival sources, the study demonstrates that both the coercive inclination of Louis XIV and the coercive capabilities of the French army have been overstated. This

raises questions about some common assumptions regarding the role of the army in the projection of state power and its contribution to the process of state formation in Early Modern France.
