Sommario/riassunto	A. Kadir Yildirim and other scholars have used the term "Muslim Democrat" to describe moderate Islamist political parties, suggesting a parallel with Christian Democratic parties in Europe. These parties (MDPs) are marked by their adherence to a secular political regime, normative commitment to the rules of a democratic political system, and the democratic political representation of a religious identity. In this book, Yildirim draws on extensive field research in Turkey, Egypt, and Morocco to examine this phenomenon and assess the interaction of economic and political factors in the development of MDPs.

Distinguishing between "competitive [economic] liberalization" and "crony liberalization," he argues that MDPs are more likely to emerge and succeed in the context of the former. He summarizes that the broader implication is that the economic liberalization models adopted by governments in the region in the wake of the Arab Spring have significant implications for the future direction of party systems and democratic reform.

Sommario/riassunto

The Historia Romana was the most popular work on Roman history in the Middle Ages. A highly interesting aspect of its transmission and reception are its many redactions which bear witness to the continuous development of the text in line with changing historical contexts. This study presents the very first classification of such rewritings, and produces new insights into historiographical discourse in the Middle Ages. Drawing on an analysis of the paraphrase contained in the manuscript Bamberg Hist. 3, which is edited here for the first time, the author offers numerous examples of textual transformations of language, style and ideology, all of which give us a clearer picture of textual fluidity in medieval historiography.
