Nota di contenuto	Pan-African brain circulation / Cynthia Lucas Hewitt -- Diaspora remittances and the financing of basic social services and infrastructure in francophone Africa south of the Sahara / Fondo Sikod and Gerard Tchouassi -- Globalization, migration, and the challenges of development in Africa / John Akokpari -- On the brain drain of Africans to America : some methodological observations / F. Nii-Amoo Dodoo, B. K. Takyi and Jesse R. Mann -- Cyberorganizing United States constituencies for Africa / Jill M. Humphries -- Biodiversity management : a current trace of the African diaspora / Paulo Moreno-Zapata -- Building the new African eco-industrial economy : circulating brains and recycling materials / Rubin Patterson -- Brain drain and its impact on Ethiopia's higher learning institutions : medical establishments and the military / Solomon A. Getahun.
Sommario/riassunto	In this book, discussions on African brain circulation and transnational society provide new insights and point to fertile research and policy agendas. Today, a globally important dilemma concerns citizens who

either depart from their homeland to enhance their life chances in a rich society - but possibly contribute to a brain drain for their homeland - or stay home and work - but possibly contribute to a brain waste since conditions at home will not allow them to contribute commensurately with their capability. Increasingly, scholars on the subject of global South-to-West emigrants argue that it is not just a possibility of a brain drain occurring when citizens emigrate or brain waste occurring when they stay home, but rather a brain gain when they emigrate strategically and contribute to development in the homeland.
