Nota di bibliografia Introductory information for therapists -- Pretreatment assessment --Nota di contenuto Session 1: Psychoeducational and behavioral therapy components --Session 2: Cognitive therapy components -- Follow-up sessions --Considerations in CBT delivery: challenging patients and treatment settings. Sommario/riassunto It is estimated that one in ten U.S. adults suffers from chronic insomnia. If left untreated, chronic insomnia reduces quality of life and increases risk for psychiatric and medical disease, especially depression and anxiety. There are two forms of insomnia: secondary insomnia, in which it is comorbid with another condition such as psychiatric disorders, chronic pain conditions, or cardiopulmonary disorders, and primary insomnia, which does not coexist with any other disorder. Though insomnia may be caused by any number of things, it is primarily sustained by the development of poor sleep habi
