

1. Record Nr.	UNINA9910782378903321
Titolo	Formal logical methods for system security and correctness [[electronic resource] /] / edited by Orna Grumberg, Tobias Nipkow and Christian Pfaller
Pubbl/distr/stampa	Amsterdam, Netherlands ; ; Washington, DC, : IOS Press, c2008
ISBN	6611733469 1-281-73346-6 9786611733469 1-4356-7788-9 1-60750-315-8 600-00-0427-3 1-4337-1233-4
Descrizione fisica	1 online resource (332 p.)
Collana	NATO security through science series. D, Information and communication security, , 1874-6268 ; ; v. 14
Altri autori (Persone)	GrumbergOrna NipkowTobias <1958-> PfallerChristian
Disciplina	005.8
Soggetti	Computer security Computer logic
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Proceedings of the NATO Advanced Study Institute on Formal Logical Methods for System Security and Correctness, Marktoberdorf, Germany, 31 July-12 August 2007."--T.p. verso.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Title page; Preface; Contents; Compilation of Certificates; Formal Foundations of Computer Security; Building a Software Model Checker; Symbolic Trajectory Evaluation (STE): Automatic Refinement and Vacuity Detection; Automated and Interactive Theorem Proving; Correctness of Effect-Based Program Transformations; Abstract and Concrete Models for Recursion; Secrecy Analysis in Protocol Composition Logic; The Engineering Challenges of Trustworthy Computing; Reflecting Quantifier Elimination for Linear Arithmetic; Content in Proofs of List Reversal; Proof Theory, Large Functions and Combinatorics Author Index

Sommario/riassunto

Offers information in the field of proof technology in connection with secure and correct software. This title shows that methods of correct-by-construction program and process synthesis allow a high level programming method more amenable to security and reliability analysis and guarantees.
