Sommario/riassunto	Following the collapse of the western Roman Empire, the Franks established in northern Gaul one of the most enduring of the Germanic barbarian kingdoms. They produced a legal code (which they called the Salic law) at approximately the same time that the Visigoths and Burgundians produced theirs, but the Frankish code is the least Romanized and most Germanic of the three. Unlike Roman law, this code does not emphasize marriage and the family, inheritance, gifts, and contracts; rather, Lex Salica is largely devoted to establishing fixed monetary or other penalties for a wide variety of damaging acts such as "killing women and children," "striking a man on the head so that the brain shows," or "skinning a dead horse without the consent of its owner." An important resource for students and scholars of medieval

and legal history, made available once again in Katherine Fischer Drew's expert translation, the code contains much information on Frankish judicial procedure. Drew has here rendered into readable English the *Pactus Legis Salicae*, generally believed to have been issued by the Frankish King Clovis in the early sixth century and modified by his sons and grandson, Chilbert I, Chlotar I, and Chilperic I. In addition, she provides a translation of the *Lex Salica Karolina*, the code as corrected and reissued some three centuries later by Charlemagne.

**Sommario/riassunto**

'This is the book we need for guidance on employment for people with Asperger's syndrome. The contributors describe their employment experiences and offer sound advice. I thoroughly enjoyed reading the success stories and took note of the words of warning of what not to do.' - Professor Tony Attwood, author of The Complete Guide to Asperger's Syndrome. Employment is an important part of a healthy, balanced and fulfilling life but less than 20 per cent of people with Asperger Syndrome (AS) are in work at any one time. The adults with AS in this book explore the issues surrounding employment, p
