

1. Record Nr.	UNINA9910782596603321
Titolo	Constitutionalism and political reconstruction [[electronic resource] /] / edited by Said Amir Arjomand
Pubbl/distr/stampa	Leiden, The Netherlands ; ; Boston, MA, : Brill, c2007
ISBN	1-281-92608-6 9786611926083 90-474-2784-X
Descrizione fisica	1 online resource (401 p.)
Collana	International comparative social studies, , 1568-4474 ; ; 14
Classificazione	86.50
Altri autori (Persone)	ArjomandSaid Amir
Disciplina	320.3
Soggetti	Comparative government Constitutional history Rule of law
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Constitutional development and political reconstruction from nation- building to new constitutionalism / Said Amir Arjomand -- Nation- building, modernization and post-colonial reconstruction -- Regimes reinventing themselves : constitutional development in the Arab world / Nathan Brown -- Constitutions and political reconstruction? Israel's quest for a constitution / Ruth Gavison -- A globalizing constitutionalism? Views from the postcolony, 1945-2000 / Julian Go -- The rule of law and politics of reform in post-revolutionary Iran / Keyvan Tabari -- Post-colonial collages : distributions of power and constitutional models, with special reference to South Africa / Heinz Klug -- Constitutional engineering and impact: the case of Fiji / Jill Cottrell and Yash Ghai -- Constitutional reconstruction since the fall of communism -- Parliament and the political class in the constitutional reconstruction of Poland : two constitutions in one / Jacek Kurczewski -- Constitutionalism and the presidency in the Russian Federation / Anders Fogelklou -- Institutional innovations and moral foundations of constitutionalism in East Central Europe : coping with the past human rights violations / Grazyna Skapska -- The constitution in the process of denationalization / Dieter Grimm -- Constitutional courts and the

new constitutionalism -- The role of constitutional courts in the transition to democracy, with special reference to Hungary / Laszlo Solyom -- Constitutional negotiations : political contexts of judicial activism in post-Soviet Europe / Kim Lane Scheppele -- Women and the cost of transition to democratic constitutionalism in Spain / Ruth Rubio-Marín -- Dissolution of political parties by the constitutional court in Turkey : judicial delimitation of the political domain / Dicle Kogacioglu -- List of contributors -- Index.

Sommario/riassunto

The themes of nation-building, post-colonial modernization and constitution-making, post-communist return to the rule of law and constitutional reconstruction, the global expansion of judicial power and judicial activism by the constitutional courts are usually studied by different specialists with somewhat narrow foci. This book is a unique and ambitious interdisciplinary attempt at the integration of these related fields, and offers a timely theoretical synthesis of the most important global constitutional trends in the last half-century. These essays by prominent authorities on different subjects and geographical areas offer a comprehensive, comparative view of the most important constitutional developments of two eras, bringing together the transplantation of the constitutional pattern of the nation-state and the current wave of globalization of constitutionalism and the rule of law. Contributors are: S.A.Arjomand, Nathan J. Brown, Ruth Gavison, Julian Go, Keyvan Tabari, Heinz Klug, Jill Cottrell, Yash Ghai, László Sólyom, Jacek Kurczewski, Anders Fogelklou, Grayna Skpska, Dieter Grimm, Kim Lane Scheppele, Ruth Rubio Marín , and Dicle Kogaciolu.

2. Record Nr.	UNINA9910299768903321
Autore	Lowen R
Titolo	Index analysis : approach theory at work / / by R. Lowen
Pubbl/distr/stampa	London : , : Springer London : , : Imprint : Springer, , 2015
ISBN	1-4471-6485-7
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (477 p.)
Collana	Springer Monographs in Mathematics, , 1439-7382
Disciplina	514.325
Soggetti	Geometry Algebra Ordered algebraic structures Approximation theory Functional analysis Topology Probabilities Order, Lattices, Ordered Algebraic Structures Approximations and Expansions Functional Analysis Probability Theory and Stochastic Processes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Approach spaces -- Topological and metric approach spaces -- Approach invariants -- Index analysis -- Uniform gauge spaces -- Extensions of spaces and morphisms -- Approach theory meets Topology -- Approach theory meets Functional analysis -- Approach theory meets Probability -- Approach theory meets Hyperspaces -- Approach theory meets DCPO's and Domains -- Categorical considerations.
Sommario/riassunto	A featured review of the AMS describes the author's earlier work in the field of approach spaces as, 'A landmark in the history of general topology'. In this book, the author has expanded this study further and taken it in a new and exciting direction. The number of conceptually and technically different systems which characterize approach spaces is increased and moreover their uniform counterpart, uniform gauge

spaces, is put into the picture. An extensive study of completions, both for approach spaces and for uniform gauge spaces, as well as compactifications for approach spaces is performed. A paradigm shift is created by the new concept of index analysis. Making use of the rich intrinsic quantitative information present in approach structures, a technique is developed whereby indices are defined that measure the extent to which properties hold, and theorems become inequalities involving indices; therefore vastly extending the realm of applicability of many classical results. The theory is then illustrated in such varied fields as topology, functional analysis, probability theory, hyperspace theory and domain theory. Finally a comprehensive analysis is made concerning the categorical aspects of the theory and its links with other topological categories. Index Analysis will be useful for mathematicians working in category theory, topology, probability and statistics, functional analysis, and theoretical computer science.
