

1. Record Nr.	UNINA9910782597603321
Autore	Treves Francois <1930->
Titolo	Topological vector spaces, distributions and kernels [[electronic resource] /] / Francois Treves
Pubbl/distr/stampa	New York, : Academic Press, 1967
ISBN	1-281-76763-8 9786611767631 0-08-087337-5
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (583 p.)
Collana	Pure and applied mathematics ; ; 25
Disciplina	515
Soggetti	Functional analysis Linear topological spaces
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographies and index.
Nota di contenuto	Front Cover; Topological Vector Spaces, Distributions and Kernels; Copyright Page; Contents; Preface; Part I: Topological Vector Spaces. Spaces of Functions; Chapter 1. Filters. Topological Spaces. Continuous Mappings; Chapter 2. Vector Spaces. Linear Mappings; Chapter 3. Topological Vector Spaces. Definition; Chapter 4. Hausdorff Topological Vector Spaces. Quotient Topological Vector Spaces. Continuous Linear Mappings; Hausdorff Topological Vector Spaces; Quotient Topological Vector Spaces; Continuous Linear Mappings; Chapter 5. Cauchy Filters. Complete Subsets. Completion Chapter 6. Compact SetsChapter 7. Locally Convex Spaces. Seminorms; Chapter 8. Metrizable Topological Vector Spaces; Chapter 9. Finite Dimensional Hausdorff Topological Vector Spaces. Linear Subspaces with Finite Codimension. Hyperplanes; Chapter 10. Frechet Spaces. Examples; Example I. The Space of \mathbb{I}_k Functions in an Open Subset Ω of \mathbb{R}^n ; Example II. The Space of Holomorphic Functions in an Open Subset Ω of \mathbb{C}^n ; Example III. The Space of Formal Power Series in n Indeterminates; Example IV. The Space \mathcal{E} of \mathcal{E}' Functions in \mathbb{R}^n Rapidly Decreasing at Infinity Chapter 11. Normable Spaces. Banach Spaces. Examples. Chapter 12. Hilbert Spaces; Chapter 13. Spaces LF. Examples; Chapter 14. Bounded Sets; Chapter 15. Approximation Procedures in Spaces of Functions;

Chapter 16. Partitions of Unity; Chapter 17. The Open Mapping Theorem; Part II: Duality. Spaces of Distributions; Chapter 18. The Hahn-Banach Theorem; (1) Problems of Approximation; (2) Problems of Existence; (3) Problems of Separation; Chapter 19. Topologies on the Dual; Chapter 20. Examples of Duals among L_p Spaces; Example I. The Duals of the Spaces of Sequences L_p ($1 \leq p < +\infty$)
Example II. The Duals of the Spaces $L_p(\Omega)$ ($1 \leq p < +\infty$)
Chapter 21. Radon Measures. Distributions; Radon Measures in an Open Subset Ω of R^n ; Distributions in an Open Subset of R^n ; Chapter 22. More Duals: Polynomials and Formal Power Series. Analytic Functionals; Polynomials and Formal Power Series; Analytic Functionals in an Open Subset Ω of C^n ; Chapter 23. Transpose of a Continuous Linear Map; Example I. Injections of Duals; Example II. Restrictions and Extensions; Example III. Differential Operators; Chapter 24. Support and Structure of a Distribution
Distributions with Support at the Origin
Chapter 25. Example of Transpose: Fourier Transformation of Tempered Distributions; Chapter 26. Convolution of Functions; Chapter 27. Example of Transpose: Convolution of Distributions; Chapter 28. Approximation of Distributions by Cutting and Regularizing; Chapter 29. Fourier Transforms of Distributions with Compact Support The Paley-Wiener Theorem; Chapter 30. Fourier Transforms of Convolutions and Multiplications; Chapter 31. The Sobolev Spaces; Chapter 32. Equicontinuous Sets of Linear Mappings
Chapter 33. Barreled Spaces. The Banach-Steinhaus Theorem

Sommario/riassunto

Topological vector spaces, distributions and kernels
