Sommario/riassunto	More than ever, international security and economic prosperity depend upon safe access to the shared domains that make up the global commons: maritime, air, space, and cyberspace. Together these domains serve as essential conduits through which international

	commerce, communication, and governance prosper. However, the global commons are congested, contested, and competitive. In the January 2012 defense strategic guidance, the United States confirmed its commitment "to continue to lead global efforts with capable allies and partners to assure access to and use of the global commons, both by st

Sommario/riassunto	This ebook contains a group of papers selected from the 2006 ZA-WWW conference, which is endorsed as a Regional Conference by the IW3C2.The papers selected not only show the scope and breadth of research being undertaken on the World Wide Web, but perhaps more importantly they also demonstrate the that South African ideas and activities play no small role in the development and use of the Web. To this end, Butler discusses the growing phenomena of phishing and how we should be protecting ourselves; in the same vein Etsebeth discusses malware and cyber risk, while Seymour and Naasden look at the...
