Sommario/riassunto	This book is intended for those who are now, and those who intend to become, clinical teachers in the health professions. Its primary focus is the teaching of medical students and residents, but the principles discussed apply equally to teaching students in other health professions. The main focus is on the process of teaching--the strategies and tactics involved in helping others learn--and the authors discuss the generic steps, strategies, and principles of effective teaching that apply in any clinical setting. They do, however, draw numerous examples from clinical education in a variety of
