Nota di contenuto	Outline of an intellectual monster -- The anti-hegelian argument -- political economy of capitalism -- The iterative nature of capitalism -- Capitalism's politeia -- Capitalism versus individuality -- Like cut flowers.
Sommario/riassunto	This multidisciplinary work departs from the Marxist materialist tradition by criticizing its logical flaws and its incapacity to work out a naturalistic materialism. Micocci argues that capitalism itself is based on a dialectical intellectuality enforced despite the non-dialectical potentialities present in the material in general. Capitalism, therefore, is a massifying system isolated from nature by an intellectual fiat, and has no capacity for theoretical and technical innovation.
