Sommario/riassunto	Designated a Doody's Core Title!. This is ""must"" reading for anyone teaching nursing, at any level, in any program or institution. Covers trends and innovative strategies to help you develop a curriculum and be more effective in using it. Educators describe problems--such as students who cannot write or high NCLEX failure rates--and how they tackled and solved them. Each chapter contains common sense approaches to every educator's questions. A resource no nursing education program can afford to be without.
