   Sommario/riassunto   In this book based on new interviews, some of country music's greatest
                         stars share personal moments of redemption, inspiration, and
                         heartache related to the music that shaped their lives. Brenda Lee
                         explains how her childhood singing gift raised her entire family out of
                         dire poverty, and Pat Boone speaks about the spiritual influence of his
                         father-in-law, Red Foley. Barbara Pittman talks about her childhood
                         friendship with Elvis Presley, while Little Jimmy Dickens divulges how
                         Hank Williams came to write a song for him and why he never recorded
                         it. Mickey Gilley talks about gladly living

New foundations for the science of consciousness
	Sommario/riassunto	Philosophers have largely abandoned the claim that the special sciences will ultimately reduce to microphysics in favour of the view that the

special sciences trade in functional explanations. However, a careful examination of scientific practice reveals that the explanatory strategy of the special sciences is neither reductionist nor functionalist, but mechanistic. Mechanistic explanations appeal to active material entities organized so as to produce the target phenomena. We claim that phenomenal consciousness will also succumb to mechanistic explanation: it will turn out to be the activity o
