1.	Record Nr.	UNINA9910782699803321
	Autore	Priest Graham
	Titolo	An introduction to non-classical logic : from if to is / / Graham Priest [[electronic resource]]
	Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2008
	ISBN	1-107-17665-4
		1-107-08629-9
		1-282-39019-8
		9786612390197
		0-511-64568-6
		0-511-80117-3
		0-511-64977-0
		0-511-39230-3
		0-511-56843-6
		0-511-39361-X
	Edizione	[Second edition.]
	Descrizione fisica	1 online resource (xxxii, 613 pages) : digital, PDF file(s)
	Collana	Cambridge introductions to philosophy
	Disciplina	511.3
	Soggetti	Nonclassical mathematical logic
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
	Nota di bibliografia	Includes bibliographical references (p. 587-602) and indexes.
	Nota di contenuto	Cover; Half-title; Title; Copyright; Dedication; Contents; Preface to the First Edition; Preface to the Second Edition; Mathematical Prolegomenon; Part I Propositional Logic; Postcript: An Historical Perspective on Conditionals; Part II Quantification and Identity; Postcript: A Methodological Coda; References; Index of Names; Index of Subjects
	Sommario/riassunto	This revised and considerably expanded 2nd edition brings together a wide range of topics, including modal, tense, conditional, intuitionist, many-valued, paraconsistent, relevant, and fuzzy logics. Part 1, on propositional logic, is the old Introduction, but contains much new material. Part 2 is entirely new, and covers quantification and identity for all the logics in Part 1. The material is unified by the underlying theme of world semantics. All of the topics are explained clearly using

devices such as tableau proofs, and their relation to current philosophical issues and debates are discussed. Students with a basic understanding of classical logic will find this book an invaluable introduction to an area that has become of central importance in both logic and philosophy. It will also interest people working in mathematics and computer science who wish to know about the area.
