Autore	Anon
Titolo	Het Nieuwe Testament, dat is: Het nieuwe Verbont onses heeren Jesu Christi In Nederduytsche, na der Griekscher waerheyt over gheset. Met de annotatien August. Marlorati, alder eerst over gheset wt de Fransoysche in Nederduytsche sprake [[electronic resource]]
Pubbl/distr/stampa	Leiden, : Jan Paets Jacobszoon, fl. 1578-1622, 1581
Descrizione fisica	Online resource (8-o)
Lingua di pubblicazione	Olandese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Reproduction of original in Koninklijke Bibliotheek, Nationale bibliotheek van Nederland.
2. Record Nr.	UNINA9910782704603321
Titolo	Climate change and technological options [[electronic resource] ] : basic facts, evaluation and practical solutions / / edited by Konrad Soyez, Hartmut Gra\FFFDI
Pubbl/distr/stampa	Wien ; ; London, : Springer, 2008
ISBN	1-282-01964-3 9786612019647 3-211-78203-6
Edizione	[1st ed. 2008.]
Descrizione fisica	1 online resource (230 p.)
Altri autori (Persone)	SoyezKonrad GrassIH
Disciplina	363.738747 551.6
Soggetti	Climatic changes - Environmental aspects Greenhouse gas mitigation - Technological innovations Technological innovations - Environmental aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [209]-218).
Nota di contenuto	The Climate System -- Climate Modelling -- Consequences of Mean Global Warming -- Impacts of and Adaptation to Climate Change -- Sustainable Development and Climate Change -- International Climate Policy Approaches -- Evaluation of Climate Effects -- Climate Effects and Mitigation Potentials of Economic Sectors -- Climate Impacts and Emission Mitigation of Industrial Production -- Climate Effects of Agricultural Processes -- Climate Effects of Waste Management -- Energy Related Climate Impacts -- Individual Activities to Reduce Climate Impacts.
Sommario/riassunto	An up-to-date text on climate change focussing on technical solutions for the most important and climate relevant economic sectors is presented. It is intended for key decision makers, and administrators within industry, agricultural and energy sectors, as well as masters students and post graduates. The first of three sections covers the scientific basis of climate change and the instruments to prevent or reduce negative climate effects. It includes a survey covering current practices at different levels. The second discusses evaluation methods for climate impacts from industrial processes. Climate relevant processes and measures to reduce their impact such as sequestration are defined in the final section, with the main focus being on renewable resources. Details are given on climate impacts of waste prevention, recycling and waste management as well as are proposals for every day solutions.
