Sommario/riassunto	An accurate and comprehensive study of the political aspects of Fielding's art has been sorely needed. As a result of decades of work by literary scholars and a series of great historians, such a study is finally possible. This volume addresses that need, and, in the light of a recent revival of interest in Fielding's work, it arrives most opportunely. The author offers here a wide-ranging focus and a firm grip on the shifting complexities of Fielding's political situations?the loyalties and enmities, factional alignments and fractious rhetoric?that allow a satisfactory understanding of Fi

Sommario/riassunto	This trilogy deals with an epistemology of economics, arguing for a radical overturning of conventional analysis and providing an alternative to political economy and social sciences, based not on positivism, but on a normative and programming paradigm. Volume III furthers work presented in Volume I and Volume II, and introduces a concrete and practical example of how to build a Planning Accounting Framework (PAF), as associated with Frisch's 'plan-frame' (explored in Volume II), to demonstrate the extent to which decisions and negotiations can be routed in the social sciences. The PAF is an instrument of the programming approach that can be used to verify the compatibility of decisions and their effects. The author builds on Frisch's classical PAF to maximise the phenomenology of economic systems, and assure a consistent and effective implementation of

decision making.
