How Managers Work: The Core; Part III. Managerial Skills: The "How-To" Satellites; Part IV. Managerial Roles: The "Action" Satellites; Epilogue; Author Index; Subject Index  |
| Sommario/riassunto      | Designated a Doody's Core Title!. This book presents the basics of leadership and management for nurses -- what is essential in order to effectively motivate and educate individuals to achieve the set goals of a group, team, or organization in health care. The basic components of management and leadership theory are described, such as effective communication, analyzing a problem, conflict resolution, and time management. Extensive simulation exercises provide learners with an opportunity to observe, experience, and carry out new behaviors in a safe environment. |
