Autore	Mladenova Olga M
Titolo	Definiteness in Bulgarian : modelling the processes of language change // Olga M. Mladenova
Pubbl/distr/stampa	Berlin ; ; New York, : Mouton de Gruyter, c2007
ISBN	1-282-19461-5 9786612194610 3-11-019889-4
Descrizione fisica	1 online resource (484 pages)
Collana	Trends in linguistics. Studies and monographs, , 1861-4302 ; ; 182
Disciplina	491.8/1
Soggetti	Bulgarian language - Definiteness Bulgarian language - History Bulgarian language - Dialects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [438]-462) and index.
Nota di contenuto	Definiteness : expression and content -- The diachronic model of definiteness -- Language variation and textology -- Definiteness in the dialects -- Bulgarian definiteness in a Balkan context.
Sommario/riassunto	In its evolution from a synthetic to an analytic language, Bulgarian acquired a grammaticalized category of definiteness. The book presents the first attempt to explore in detail how this happened by comparing the earliest Modern Bulgarian texts with contemporary dialect and standard Bulgarian data. The basic units of analysis are the various types of nominal structures headed by nouns or pronouns. The analysis requires the strict terminological disentanglement of form from content and the adoption of a default inheritance model of definiteness that allow the exhaustive classification and tagging of nominal structures encountered in the texts. Tagging makes it possible to apply quantitative analysis to nominal structure and to assess the types available in the early texts from a current native-speaker perspective. Based on an S-curve model of language change, the study establishes that overt markers of definiteness were first made available to identifiability-based definites, then to inclusiveness-based definites, quantitative generics and unique referents. The overt markers of

indefiniteness followed suit, separating indefinites from non-specifics and typifying generics. This progression of definiteness was directed by variables such as person, animacy, gender, number and noun-class, and started in contexts in which definiteness closely interacted with possessivity. Such an analysis leads to the realization that the two-dimensional S-curve model does not account for all language change and that there is a need for a three-dimensional model. It also demonstrates that, contrary to previous assumptions, there is continuity between the early Slavic marker of definiteness (long-form adjectives) and the Modern Bulgarian article. This discovery, in conjunction with geolinguistic arguments, sheds new light on the role that relations inside the Balkan Sprachbund played in the grammaticalization of Bulgarian definiteness.
