Descrizione fisica	1 online resource (xii, 311 pages) : digital, PDF file(s)
Disciplina	001
Soggetti	Biology - History - 21st century Social sciences - History - 21st century Humanities - History - 21st century Science - History - 21st century
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references (p. 277-300) and index.
Nota di contenuto	Characterizing the three cultures -- The natural sciences -- Social sciences 1 -- Social sciences 2 -- The humanities -- Current tensions.
Sommario/riassunto	In 1959 C. P. Snow delivered his now-famous Rede Lecture, 'The Two Cultures,' a reflection on the academy based on the premise that intellectual life was divided into two cultures: the arts and humanities on one side and science on the other. Since then, a third culture, generally termed 'social science' and comprised of fields such as sociology, political science, economics, and psychology, has emerged. Jerome Kagan's book describes the assumptions, vocabulary, and contributions of each of these cultures and argues that the meanings of many of the concepts used by each culture are unique to it and do not apply to the others because the source of evidence for the term is special. The text summarizes the contributions of the social sciences and humanities to our understanding of human nature and questions

the popular belief that biological processes are the main determinant of variation in human behavior.
