

1. Record Nr.	UNINA9910782804603321
Titolo	Australian saltmarsh ecology [[electronic resource] /] / editor, Neil Saintilan
Pubbl/distr/stampa	Collingwood, Vic., : CSIRO Pub., c2009
ISBN	0-643-09859-3 1-283-15518-4 9786613155184 0-643-09684-1
Descrizione fisica	1 online resource (249 p.)
Altri autori (Persone)	SaintilanNeil
Disciplina	577.690994
Soggetti	Salt marsh ecology - Australia Salt marshes - Australia Coastal zone management - Australia
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; List of contributors; Preface; Chapter 1 Australian saltmarshes in global context; Chapter 2 Distribution of Australian saltmarsh plants; Chapter 3 Geomorphology and habitat dynamics; Chapter 4 The ecology of molluscs in Australian saltmarshes; Chapter 5 Ecology of burrowing crabs in temperate saltmarsh of south-east Australia; Chapter 6 Fish on Australian saltmarshes; Chapter 7 Saltmarsh as habitat for birds and other vertebrates; Chapter 8 Ecology and management of mosquitoes; Chapter 9 Protection and management of coastal saltmarsh Chapter 10 Mapping, assessment and monitoring of saltmarshesIndex
Sommario/riassunto	"Australian Saltmarsh Ecology presents the first comprehensive review of the ecology and management of Australian saltmarshes. The past 10 years in particular have seen a sustained research effort into this previously poorly understood and neglected resource. In 10 chapters contributed by experts in each discipline, the book outlines what is known of the biogeography and geomorphology of Australian saltmarshes, their fish and invertebrate ecology, the use of Australian saltmarshes by birds and insectivorous bats, and the particular

challenges of management, including the control of mosquito pests, and the issue of sea-level rise. It provides a powerful argument that coastal saltmarsh is a unique and critical habitat vulnerable to the combined impacts of coastal development and sea-level rise."--
