| Sommario/riassunto | The use of grammatical gender in the Australian language Mawng calls into question prevailing ideas about the functions of nominal |

classification systems. Mawng's gender system has a strong semantic basis and plays an important role in the construction of meaning in discourse. Gender agreement in verbs is frequently lexicalized, creating idioms called lexicalised agreement verbs that are structurally similar to noun-verb idioms. This book will be of interest to anyone interested in nominal classification or cross-linguistic approaches to idioms.

Sommario/riassunto

The global shortage of effective business leaders makes urgent the search for new insights about the nature of global leadership and the best means of developing such leaders. This text is a response to this urgent need. The rapid globalization of the economy places business leaders in new and demanding international settings and requires them to work across cultures. Volume 3 of *Advances in Global Leadership* presents original papers on the psychology of global leadership and the development of international and global leaders. Chapters are authored by academics, business leaders and consultants throughout the world who bring their various insights into global leadership.
