

1. Record Nr.	UNINA9910782827803321
Autore	Moore Colleen F. <1950->
Titolo	Children and pollution [[electronic resource]] : why scientists disagree / / Colleen F. Moore
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2009
ISBN	0-19-045267-6 1-282-05400-7 9786612054006 0-19-972829-1
Descrizione fisica	1 online resource (375 p.)
Disciplina	618.92 618.92/98 618.9298
Soggetti	Pediatric toxicology Environmental toxicology Pollution - Psychological aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 259-338) and index.
Nota di contenuto	Contents; Prologue; 1 Lead and the Roots of Environmental Controversies; 2 Mercury: Not Just a Fish Story; 3 PCBs: Another Global Pollutant; 4 Neurotoxins Influence Neurodevelopment: Organophosphorus and Carbamate Pesticides; 5 Noise: A Barrier to Children's Learning; 6 It Isn't Fair: Environmental Pollution Disasters and Community Relocations; 7 The Best Science, Values, and the Precautionary Principle to Protect Children; 8 Protect Your Family, Protect Our Planet; Afterword: A Few Remarks on Global Warming; Appendix: Understanding Two Important Statistical Concepts; Endnotes; References Index
Sommario/riassunto	How does pollution impact our daily quality of life? What are the effects of pollution on children's development? Why do industry and environmental experts disagree about what levels of pollutants are safe? In this clearly written book, Moore traces the debates around five key pollutants---lead, mercury, noise, pesticides, and dioxins and

PCBs---and provides an overview of the history of each pollutant, basic research findings, and the scientific and regulatory controversies surrounding it. Moore focuses, in particular, on the impact of these pollutants on children's psychological development-
