Narayanan New Delhi, India,: New Age International (P) Ltd., Publishers, c2005 Pubbl/distr/stampa **ISBN** 1-282-07422-9 9786612074226 81-224-2646-8 Descrizione fisica 1 online resource (261 p.) Disciplina 572.80285 Soggetti Molecular biology - Data processing **Bioinformatics** Computational biology - Methodology Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Note generali Includes index. Nota di contenuto Cover; Preface; Acknowledgement; Contents; Chapter 1 Bioinformatics: Introduction: Chapter 2 Atoms and Molecules: Chapter 3 Features of Nucleic Acids; Chapter 4 Features of Proteins; Chapter 5 Physicochemical Characterization of Biomolecules; Chapter 6 Primary Structure (Sequence) Determination of Biomolecules; Chapter 7 Spatial Structure Determination of Biomolecules; Chapter 8 Protein-Ligand Interactions; Chapter 9 The Protein-folding Problem; Chapter 10. Computational Methods in Structure Prediction; Chapter 11 Database Search; Chapter 12 Data Mining, Analysis and Modeling Chapter 13 Medico- and PharmacoinformaticsChapter 14 Molecular Engineering; Glossary; Index Sommario/riassunto About the Book: Bioinformatics is the bridge between experimental data in diverse biologically related disciplines and extrapolation of information, by computational analysis, about how the systems and processes function. The central aims are: (i) elucidation (by experimental methods) of structural features of the biological entities (proteins, nucleic acids, etc.), (ii) application of computational tools and approaches to study of information content, organization, and

processing in biological systems, (iii) application of medical and health

data at the molecular level (biomedinformatics), a
