

1. Record Nr.	UNINA9910782914303321
Titolo	Special issue on internet security [[electronic resource] /] / Guest editors Matthew Warren, William Hutchinson and Gurpreet Dhillon
Pubbl/distr/stampa	Bradford, England, : Emerald Group Publishing, c2002
ISBN	1-280-47948-5 9786610479481 1-84544-698-4
Descrizione fisica	1 online resource (100 p.)
Collana	Logistics information management ; ; v.15, no. 5/6
Altri autori (Persone)	DhillonGurpreet HutchinsonWilliam WarrenMatt
Disciplina	005.8
Soggetti	Computer security Internet - Security measures
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Contents; Abstracts & keywords; Guest Editorial; An information security meta-policy for emergent organizations; Security practice; A prototype tool for information security awareness and training; Perceived information security, financial liability and consumer trust in electronic commerce transaction; Data protection and privacy; A security evaluation criteria; Challenges of implementing public key infrastructure in Netcentric enterprises; Information security for agent-based WWW medical information retrieval; Computer viruses; Concepts in information warfare Securing information infrastructure from information warfare Note from the publisher
Sommario/riassunto	The fact that our lives are changing as a result of the spread of technology is widely accepted. The nature of the "society" that will result has been forecast by numerous authors (e.g. Martin, 1988; Toffler, 1981). While differing in many respects, all share the common vision of the electronic computer and communications as the foundations on which society's critical infrastructure will be built.
