Nota di contenuto	Just the facts: serious chronic disease in the last phase of life -- Seeing the world differently: ideas to shape reform -- Good care for some people, sometimes -- Surveying the terrain: opportunities and challenges -- Good care for us all: building the care system to count on.
Sommario/riassunto	Just a few generations ago, serious illness, like hazardous weather, arrived with little warning, and people either lived through it or died. In this important, convincing, and long-overdue call for health care reform, Joanne Lynn demonstrates that our current health system, like our concepts of health and disease, developed at a time when life was mostly short, serious illnesses and disabilities were common at every age, and dying was quick. Today, most Americans live a long life, with the disabilities and discomforts of progressive chronic illness appearing only during the final chapters of their life stories. Sick to Death and Not Going to Take It Anymore! maintains that health care and community services are not set up to meet the needs of the large number of people who face a prolonged period of progressive illness and disability before death. Lynn offers what she calls an "owner's manual for the health care

system," which lays out facts, concepts, strategies, and action plans for genuine reform and gives the reader new ways to interpret information creatively, imagine innovative possibilities, and take steps to implement them.

Nota di bibliografia	Includes bibliographical references (pages 393-409) and index.
Nota di contenuto	1. Science, society and Darwin's idealization -- 2. Darwin's society and science -- 3. Racism and its societal repercussions -- 4. Misogyny and its damaging legacy -- 5. Bringing reality to society and science.
Sommario/riassunto	In this book Diogo, a renowned biologist and anthropologist, addresses a question that is critical for the understanding of science, beliefs, idolization, systemic racism and sexism, and our societies in general: why has Darwin been idolized in such a unique way, particularly by Western scholars? Diogo shows that many evolutionary 'facts' stated in Darwin's works, particularly about human evolution, are inaccurate constructions based on Victorian biases and stereotypes: non-Europeans are inferior, women have a lower intelligence than men, Victorian society was the pinnacle of evolution, and so on. Importantly, such inaccurate biased statements about our evolution are markedly in

contrast with the mostly accurate, and often brilliant, ideas put forward by Darwin concerning non-human organisms. Importantly, it was precisely the combination of such brilliant ideas, the use of simplistic and sometimes exaggerated metaphors that were catchy and easily absorbed by the general public, and Darwin's intellectual conservatism and biased ideas about women and non-European peoples that led to Darwin's idolization, particularly by Western scientists, as well as to the darkest societal repercussions of his works. By portraying such biased ideas as "evolutionary facts", Darwin provided easy ammunition for populist political leaders, authoritarians, colonialists, and white supremacists to 'scientifically' defend social hierarchies, sexism, racism, discrimination, oppression, and segregation. A typical argument used to defend Darwin from portraying such erroneous sexist and racist ideas as "facts" is that 'back then' everybody was racist and sexist. Diogo deconstructs this argument by providing enthralling case studies and travel descriptions by authors such as Wallace and Humboldt, who often praised the indigenous peoples that repulsed - and criticized the social hierarchies and Western imperialism that marveled - Darwin. The aim of this book is therefore not to 'cancel' Darwin or argue that he was always wrong: not at all, in general he was an extraordinary biologist, but was a much less successful anthropologist due in great part to his Victorian biases. Instead, the book discusses Darwin's writings, ideas, and their repercussions in a broader way, without taboos, omissions, idolization or demonization in order to show Darwin, and science in general, in all their complexity. This is because, if we fail to acknowledge and emphasize the biases, prejudices, inaccuracies, and abuses of our past, and merely continue to blindly idealize it, our kids will be condemned to undertake or suffer similar societal abuses in the future.

6. Record Nr.	UNINA9910144074703321
