| Sommario/riassunto | Air pollution is a mixture of particles and gases, which can reach unsafe concentrations for human health, the environment, vegetation, |

and materials. It has become one of the main sustainability issues and a concerning topic in atmospheric science. According to the World Health Organization (WHO), 90% of the world's population lives in highly polluted environments, and about 7 million premature deaths are caused yearly by outdoor and indoor air pollution. The combination of fast-growing populations, transport, fossil fuels, and biomass burning leads to pollution levels being especially high in some urban areas. Agriculture and natural phenomena are also important sources of pollution, underscoring the multi-faceted and transboundary nature of air pollution. The monitoring and understanding of the temporal and spatial behaviours of air pollutant concentrations are essential for both the implementation of air quality policies and the definition of effective measures to mitigate air pollution and its effects. Quantifying and monitoring exposure to air pollution in terms of public health is also a critical component in policy discussion. This reprint presents recent research activities concerning the characterization of air pollution and the applied modelling approaches.

3. Record Nr.	UNINA9910783080203321
Autore	Waldinger Roger David
Titolo	How the other half works [[electronic resource]] : immigration and the social organization of labor / / Roger Waldinger and Michael I. Lichter
Pubbl/distr/stampa	Berkeley, Calif., : University of California Press, c2003
ISBN	1-282-35954-1 1-59734-664-0 0-520-93617-5 9786612359545
Descrizione fisica	1 online resource (301 p.)
Altri autori (Persone)	LichterMichael Ira <1960->
Disciplina	331.6/2/097949409049
Soggetti	Foreign workers - California - Los Angeles County Employer attitude surveys - California - Los Angeles County Immigrants - Social networks - California - Los Angeles County Unskilled labor - California - Los Angeles County
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.

Nota di bibliografia	Includes bibliographical references (p. 253-276) and index.
Nota di contenuto	Front matter -- Contents -- Illustrations -- Acknowledgments -- 1. Introduction -- 2. What Employers Want -- 3. Doing the Job -- 4. The Language of Work -- 5. Network, Bureaucracy, and Exclusion -- 6. Social Capital and Social Closure -- 7. Bringing the Boss Back In -- 8. Whom Employers Want -- 9. "Us" and "Them" -- 10. Diversity and Its Discontents -- 11. Black/Immigrant Competition -- 12. Conclusion -- Appendix: The Local Context -- Notes -- Index
Sommario/riassunto	How the Other Half Works solves the riddle of America's contemporary immigration puzzle: why an increasingly high-tech society has use for so many immigrants who lack the basic skills that today's economy seems to demand. In clear and engaging style, Waldinger and Lichter isolate the key factors that explain the presence of unskilled immigrants in our midst. Focusing on Los Angeles, the capital of today's immigrant America, this hard-hitting book elucidates the other side of the new economy, showing that hiring is finding not so much "one's own kind" but rather the "right kind" to fit the demeaning, but indispensable, jobs many American workers disdain.
