Recommendations; Acknowledgements; References; Annex 1; Definition of integrated health services; Annex 2; Integrating home-based long-term care into the health and social system; Annex 3; Availability of material resources for home-based long-term care incountries at different stages of economic development
Sommario/riassunto	Records the conclusions and recommendations of a study group commissioned to explore the use of home-based care as a strategy for coping with the growing number of individuals in need of long-term care. Addressed to policy-makers the report responds to striking demographic and epidemiological changes that have created an urgent need to expand the availability of cost-effective chronic care. These changes include the growing population of elderly persons and the devastating impact of HIV/AIDS on social networks and health services. With these problems in mind the report aims to help policy-make
