Sommario/riassunto	Management information systems (MIS) produce the information that managers use to make important strategic decisions. This book takes a decidedly managerial perspective, focusing on how people perceive and respond to information, and how MIS design can use this information to help managers make better decisions, and avoid information overload. - ;Management information systems (MIS) produce the information that managers use to make important strategic decisions. This book covers the essential managerial skills that are necessary to design these systems. In contrast to other books on management
