	Titolo	Domino Designer 6 [[electronic resource]] : a developer's handbook / / [Tommi Tulisalo ... et al.]
	Pubbl/distr/stampa	[Cambridge, Mass.], : IBM International Technical Support Organization, c2002
	Edizione	[1st ed.]
	Descrizione fisica	xxii, 826 p. : ill
	Collana	Redbooks
	Altri autori (Persone)	TulisaloTommi
	Soggetti	Web site development
		Application software - Development
		Electronic commerce - Computer programs
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	"Lotud.software"--Cover.
		"December 2002."
		"SG24-6854-00."
	Nota di bibliografia	Includes bibliographical references (p. 799-800) and index.
	Sommario/riassunto	In this IBM Redbook, we describe how to develop applications with IBM Lotus Domino Designer 6. With Domino Designer, you are able to create applications hosted by a Domino server. These applications can be used by different clients, such as Notes clients, Web browsers or mobile devices. We introduce, and show in detail, how you can use all the design elements of Domino Designer, such as forms, pages, views, agents, outlines, resources and framesets. Readers who are familiar with developing applications using Release 5 of Lotus Domino may want to start at Chapter 12, which introduces the new features in Domino 6.0, and continue from there. In the chapters toward the end of the book, we discuss the different programming languages, @functions, LotusScript, JavaScript, and Java, that can be used in Domino. We detail how to manipulate rich text objects by programming, as well as XML, in Domino. This redbook was written for technical specialists, developers and programmers, customers, IBM Business Partners, and the IBM and Lotus community who need technical understanding of how to develop applications using IBM Lotus
