

1. Record Nr.	UNINA9910783115903321
Autore	Walker Lawrence R.
Titolo	Primary succession and ecosystem rehabilitation // Lawrence R. Walker and Roger del Moral [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2003
ISBN	1-107-13027-1 1-280-43031-1 9786610430314 1-139-14700-5 0-511-17866-2 0-511-06328-8 0-511-05695-8 0-511-30588-5 0-511-61507-8 0-511-07174-4
Descrizione fisica	1 online resource (xiii, 442 pages) : digital, PDF file(s)
Disciplina	577/.18
Soggetti	Ecological succession Ecosystem management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references (p. [357]-427) and index.
Nota di contenuto	Cover; Half-title; Title; Copyright; Contents; Preface and acknowledgements; 1 Introduction; 2 Denudation: the creation of a barren substrate; 3 Successional theory; 4 Soil development; 5 Life histories of early colonists; 6 Species interactions; 7 Successional patterns; 8 Applications of theory for rehabilitation; 9 Future directions; Glossary; Illustration credits; References; Index
Sommario/riassunto	Natural disturbances such as lava flows, landslides and glacial moraines, and human-damaged sites such as pavement, road edges and mine wastes often leave little or no soil or biological legacy. This 2003 book provided the first comprehensive summary of how plant, animal and microbial communities develop under the harsh conditions following such dramatic disturbances. The authors examine the basic

principles that determine ecosystem development and apply the general rules to the urgent practical need for promoting the reclamation of damaged lands. Written for ecologists concerned with disturbance, landscape dynamics, restoration, life histories, invasions, modeling, soil formation and community or population dynamics, this book will also serve as an authoritative text for graduate students and a valuable reference for professionals involved in land management.
