

1. Record Nr.	UNINA9910783118703321
Autore	Mount Kenneth R.
Titolo	Computation and complexity in economic behavior and organization / / Kenneth R. Mount, Stanley Reiter [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2002
ISBN	1-107-12247-3 0-521-03789-1 1-280-16043-8 1-139-14697-1 0-511-11926-7 0-511-05691-5 0-511-30454-4 0-511-75424-8 0-511-07170-1
Descrizione fisica	1 online resource (ix, 237 pages) : digital, PDF file(s)
Disciplina	330/.01/51
Soggetti	Economics, Mathematical Organizational behavior Computational complexity
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references (p. 229-233) and index.
Nota di contenuto	Cover; Half-title; Title; Copyright; Dedication; Contents; Acknowledgments; 1 Introduction; 2 F Networks; 3 Networks of Real-Valued Functions; 4 Applications to Economics; 5 Applications to Games; 6 Lower Bounds and Approximations; 7 Organizations; Appendix A Appendix to Chapter 2: Graph Theory; Appendix B Appendix to Chapter 3: Real-Valued Functions; Appendix C Appendix to Chapter 5: Application to Games; Bibliography; Index
Sommario/riassunto	This book presents a model of computing and a measure of computational complexity which are intended to facilitate analysis of computations performed by people, machines, or a mixed system of people and machines. The model is designed to apply directly to models of economic theory, which typically involve continuous

variables and smooth functions, without requiring analysis of approximations. The model permits analysis of the feasibility and complexity of the calculations required of economic agents in order for them to arrive at their decisions. The treatment contains applications of the model to game theory and economics, including comparison of the complexities of different solution concepts in certain bargaining games, and the trade-off between communication and computation in an example of an Edgeworth Box economy.
