Sommario/riassunto

This volume brings together 22 contributions to the study of Arabic
 dialects, from the Maghreb to Iraq by authors, who are all well-known
 for their work in this field. It underscores the importance of different
 theoretical approaches to the study of dialects, developing new
 frameworks for the study of variation and change in the dialects, while
 presenting new data on dialects (e.g., of Jaffa, Southern Sinai, Nigeria,
 South Morocco and Mosul) and cross-dialectal comparisons (e.g., on
 the feminine gender and on relative clauses). This collection is
 presented to Manfred Woidich, one of the most eminent scholars in the
 field of Arabic dialectology.

Sommario/riassunto	A fresh investigation of the Labour party's foreign policy in her formative years, radically revising previous interpretations. This rich analytical account of the Labour party's foreign policy between the party's formation and the fall of the first Labour government in 1924 demonstrates that the party's policy development during this period was far more sophisticated than has previously been considered. The party was neither merely the ideological cipher for ex-Liberals in the Union of Democratic Control; nor did it enter government devoid of policy ideas. Rather, as the author shows, the party sought consistently to construct and eventually to implement a genuinely radical foreign policy. This involved significant input from the wider labour movement, and was also influenced at important moments by contacts with the

international socialist movement. Rejecting doctrinally rigid approaches to Labour policy development, the author demonstrates that many ideological currents flowed through the early Labour party, and, crucially, that one of the strongest traditions influencing the formation of the party's post-war foreign policy objectives was Gladstonian internationalism, rather than the anti-war Cobdenite radicalism of the UDC and its allies. Before the war, Labour is shown to have been actively engaged in attempts by progressives to establish ideological links between socialism, radicalism and liberalism in ways appealing to the new mass electorate. Thereafter, it built on these traditions to help consolidate its claim to be the legitimate heir to nineteenth-radical traditions in foreign policy.
