                           SiciliaMiguel-Angel

   Disciplina   004.678

   Soggetti   Library science
                       World Wide Web

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Note generali   Description based upon print version of record.

   Nota di contenuto   CONTENTS; EDITORIAL ADVISORY BOARD; Editorial; Digital libraries in
                       the knowledge era; Libraries as knowledge management centers;
                       Semantic Web technologies for digital libraries; Applying semantic
                       technology to a digital library: a case study; Towards personalization in
                       digital libraries through ontologies; Integrating semantic metadata in
                       P2P-based digital libraries; Building a distributed digital library for
                       natural disasters metadata with grid services and RDF; Reasoning
                       against a semantic digital library framework based on grid technology
                       Mining novel connections from large online digital library using
                       biomedical ontologiesA cooperative environment for the negotiation of
                       term taxonomies in digital libraries; On the conceptualisation of the
                       query refinement task; Awards for Excellence

   Sommario/riassunto Goes beyond the traditional verbalisms for the role of the Semantic Web
                       in Digital Libraries. Features a balanced mix of papers which are
                       introductory to the topic and also advanced research papers at the
                       leading edge of the SW evolution. The papers aim to motivate readers
                       to be part of this exciting community.
