Sommario/riassunto	Accountability of government to citizens-the idea that the public sector must answer to the people for its performance-is the foundation for good governance. Under good governance, public expenditures are allocated to maximize welfare, revenues are collected efficiently, and

the public at large has access to a number of public services including water and sanitation, infrastructure, education and health. Unfortunately in many developing countries, the people suffer the results of dysfunctional governance systems that fail to provide even minimal levels of vital public services. This happens be
