

1. Record Nr.	UNINA9910783367003321
Autore	Hochachka Peter W.
Titolo	Biochemical adaptation : mechanism and process in physiological evolution // Peter W. Hochachka, George N. Somero
Pubbl/distr/stampa	Oxford, England : , : Oxford University Press, , 2002 ©2002
ISBN	0-19-770035-7 1-280-47035-6 9786610470358 1-282-36726-9 9786612367267 0-19-535367-6 1-60256-234-2
Descrizione fisica	1 online resource (464p.) : ill
Disciplina	572.8/38
Soggetti	Adaptation (Physiology) Physiology, Comparative Molecular evolution
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Machine generated contents note: 1 The Goals and Scope of This Volume 3 --2 Cellular Metabolism, Regulation, and Homeostasis 20 --3 Influence of Oxygen Availability 101 -- 4 The Diving Response and Its Evolution 158 --5 Human Hypoxia Tolerance 186 --6 Water-Solute Adaptations: The Evolution and Regulation of the Internal Milieu 217 --7 Temperature 290 -- Index 451.
Sommario/riassunto	Suitable for graduates and undergraduates in environmental biology, comparative physiology, and marine biology, this text lays out the principles of mechanistic comparative physiology in an ecological and evolutionary context.
