| Soggetti | Medical personnel - Diseases Medical personnel - Health and hygiene Musculoskeletal system - Diseases |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | Cover; Title page; Preface; Acknowledgements; The participating institutions; Contents; 1. Introduction to Musculoskeletal Diseases: The Biomed IV Project; 2. The Identification and Measurement of Risk; 3. Measurement of Spinal Loading: Shrinkage; 4. Epidemiology: Musculoskeletal Problems in Belgian Nurses; 5. Epidemiology of Musculoskeletal Disorders in a Sample of British Nurses and Physiotherapists; 6. Electromyography in Occupational Activities 7. The Implementation of Additional Software for 3-D Analysis of Coupled Motion in the Cervical Spine by Means of an Electromagnetic Tracking Device8. A Method for Job Evaluation using a Modified Delphi-Survey; 9. Physiological Assessments of Occupational Activities; 10. Spinal Shrinkage during Simulated Nursing and Porters' Tasks; 11. The Effects of the Nurse's Job on the Diurnal Variation of the Segments of the Spine - An Anthropometric Approach; 12. Body Composition: Part I. Physical and Structural Distribution of the Human Skin 13. Body Composition: Part II. ""Whole-Body Adiposity"" Prediction: Males versus Females14. Body Composition: Part III. In vivo Application |

of a Selection of Formulae for Predicting Whole-Body Adipose Tissue in Male and Female Nurses; 15. Musculoskeletal Disorders in Health-Related Occupations: Project Overview and Outcomes; Subject Index; Appendix: Publications and Communications from the Biomed IV Research Project; Author Index

Sommario/riassunto

This work focuses on the study of occupational musculoskeletal diseases, which was the subject of a European collaborative research project under the Biomed IV programme. The authors provide a comprehensive background for the approaches towards studying musculoskeletal problems.
