Sustaining Human Settlement Development: Strategic Foci -- Epilogue: Liveability of Cities in a Globalizing World -- References -- Background Papers -- Part VII: Statistical Annex -- Country Level data -- City Level Data -- Index.

Sommario/riassunto	Cities in a Globalizing World presents a comprehensive review of the world's cities and analyses the positive and negative impacts on human settlements of the global trends towards social and economic integration and the rapid changes in information and communication technologies. In this Global Report, the United Nations Centre for Human Settlements (Habitat) draws on specially commissioned and contributed background papers from more than 80 leading international specialists. The report focuses on recent trends in human settlements and their implications for poverty, inequity and social polarization. It develops advance knowledge for urban planning and management policies in support and promotion of inclusive cities and good urban governance. This major and influential report is the most authoritative and up-to-date assessment of human settlements conditions and trends. Written in clear, non-technical language and supported by informative graphics, case studies and extensive statistical data, it should be an essential tool and reference for academics, researchers, planners, public authorities and civil society organizations around the world.
