

1. Record Nr.	UNINA9910783523703321
Titolo	DFSMStvs application migration guide [[electronic resource] ] : June 2003 // [Nigel Morton ... et al.]
Pubbl/distr/stampa	[S.l.] , : IBM, International Technical Support Organization, 2003
Edizione	[1st ed.]
Descrizione fisica	xvi, 176 p. : ill
Collana	IBM redbooks
Altri autori (Persone)	MortonNigel
Disciplina	005.4/3
Soggetti	Virtual storage (Computer science) CICS (Computer system) Electronic data processing - Batch processing Application software - Development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"June 2003." "SG24-6972-00."
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	This IBM Redbooks publication will help you to migrate batch VSAM applications to exploit transactional VSAM. DFSMStvs is available in a z/OS environment and offers the ability for VSAM data to be shared for both read and write operations while maintaining integrity and recoverability. DFSNStvs allows logging of changes to recoverable VSAM data sets. Batch programs can use commit and backout functions. This book assumes that you are familiar with the material in the companion book DFSMStvs Overview and Planning, SG24-6971, and refers extensively to material published in that book. We also assume some familiarity with CICS Transaction Server and z/OS. The book is intended for application developers who want to understand how to change applications to make best use of the facilities offered by DFSMStvs and to coexist well with other batch applications and with CICS systems sharing the same VSAM data sets. We assume that you are familiar with the development of batch applications and with the facilities and use of VSAM. The tasks involved in setting up DFSMStvs and the hardware and software prerequisites are not discussed in this book; they are described in DFSMStvs Overview and Planning, SG24-6971.
