Nota di contenuto	Urban block shapers -- Housing and landscapes -- Superblock configurations -- Tall towers -- Big buildings -- Infrastructural engagements -- Indigenous reinterpretations -- Infill and puntal interventions -- Housing special populations -- A turning point.
Sommario/riassunto	This book combines the architectural and urban scales to demonstrate that urban intensity determines the success of housing. The authors provide a typology of housing according to the ways in which diversity and density are created. Comparisons with historical models and critical appraisals based on the authors' unique standing give information on the pros and cons of major types of housing, their pitfalls and successful examples.

Sommario/riassunto

This important volume provides a source of information on the key issues, including constraints and capacity building, necessary to implement participatory approaches in China today. A wealth of case studies are provided by principal Chinese academics and practitioners in forestry, natural resource management, rural development, irrigation and poverty alleviation. At the core, the book is about strengthening local government as a key player in the development of participatory initiatives. It is an invaluable text for development practitioners, donors, researchers and students seeking to unders
