

1. Record Nr.	UNINA9910783550003321
Autore	White Bill
Titolo	Getting started with the IBM 2109 M12 FICON Director [[electronic resource] /] / [Bill White, Wolfgang Fries, Manfred Lindenau]
Pubbl/distr/stampa	[S.l.], : IBM, International Technical Support Organization, 2003
Edizione	[1st ed.]
Descrizione fisica	1 online resource (116 p.)
Collana	IBM redbooks
Altri autori (Persone)	FriesWolfgang LindenauManfred
Disciplina	004.6/6
Soggetti	Fibre Channel (Standard) Computer input-output equipment Storage area networks (Computer networks)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"October 2003."
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	This IBM Redbooks publication discusses how to install, tailor, and configure the IBM 2109 M12 FICON Director, in conjunction with the FICON topologies supported by IBM eServer zSeries (800, 900, and 990) and 9672 Generation 5 and Generation 6 servers. We focus on the hardware installation, as well as the software definitions needed to provide connectivity for the supported FICON environments. This book provides planning information and FICON Director setup information. We also include helpful utilities for monitoring and managing the IBM 2109 M12 FICON Director. This document is intended for system engineers, SAN administrators, and system programmers who will plan and install IBM 2109 M12 FICON Directors. A good background in systems planning, hardware and cabling infrastructure planning, and zSeries I/O definitions (HCD or IOCP), as well as Fibre Channel or FICON Directors, is assumed.
