Descrizione fisica	1 online resource (112 p.)
Collana	Internet research ; ; v.16, no. 2
Altri autori (Persone)	GritzalisStefanos
Disciplina	005.8
Soggetti	Internet - Security measures Privacy, Right of
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Cover; CONTENTS; EDITORIAL ADVISORY BOARD; Guest editorial; Anonymous attribute certificates based on traceable signatures; Incorporating privacy requirements into the system design process; Protecting privacy in e-cash schemes by securing hidden identity approaches against statistical attacks; An incentive-based architecture to enable privacy in dynamic environments; Agyaat: mutual anonymity over structured P2P networks; Regroup-And-Go mixes to counter the (n-1) attack
Sommario/riassunto	This e-book discusses the issues surrounding informational privacy - assuming that privacy is the infeasible right of an individual to control the ways in which personal information is obtained, processed, distributed, shared and used by any other entity. The review of current research work in the area of user privacy has indicated that the path for user privacy protection is through the four basic privacy requirements namely anonymity, pseudonymity, unlinkability and unobservability. By addressing these four basic requirements one aims to minimize the collection of user identifiable data.
