Policies for Improving Human Development; 5. Progress with Public Sector Reforms; 6. Addressing the Challenge of Growing Inequality; 7. Future Reform Priorities; Notes; References
Sommario/riassunto	South Asia has performed well over the past 25 years in reducing poverty, improving human development and increasing growth, but faster progress with poverty reduction will require a higher rate of growth. This book shows that the development performance is not a puzzle but largely explained by good policies. Countries in the region have maintained good macroeconomic environments, opened up their economies to greater domestic and international competition, and reduced the role of corrupt and inefficient public enterprises.
