Sommario/riassunto

This volume analyses the business environment in East Asia with reference to trade and investment flows within the region and between East Asia and Europe. Focusing on the two-way flow of management ideas, investment and technology, this study highlights the way in which both sides can benefit.

Oral Mucosa and Gingiva -- Chapter 7. Saliva -- Chapter 8. Acquired Enamel Integuments: Pellicle, Plaque, and Calculus -- Chapter 9. Functions of Fluoride in the Oral Cavity -- Index.

Sommario/riassunto

This book provides the reader with a comprehensive understanding of oral biochemistry by explaining the role of basic biochemistry and dentistry concepts and identifying their metabolic processes of soft tissues that comprise oral and maxillofacial anatomy. The book also discusses how metabolic abnormalities are related to the development of oral diseases. Readers will gain a comprehensive perspective on a variety of oral conditions and related metabolic abnormalities. Individual chapters are focused on crucial topics such as enamel, dentine, saliva, fluoride, and many more. The importance of evidence-based explanation and case study details are also highlighted. Oral biochemistry is the first book to be devoted entirely to this area, and it will be of interest to researchers, students, and practitioners.
